Knowledge is POWER – Motion Force Control is our Business

HYQUIP Limited New Brunswick Street Horwich Bolton Lancashire BL6 7JB UK

HYDAC QUALITY AND PERFORMANCE

HYDAC BETAFIT® Filter Elements are dimensionally similar to other manufacturer's elements and will fit interchangeably into their filter housings.

There are no claims regarding comparative performance characteristics as applied in actual system operation. In fact, all interchange elements vary greatly in performance and longevity in the systems in which they are applied.

HYDAC, a leader in the design of absolute-rated fiberglass filters, focuses on the optimization of the following characteristics:

- High efficiency for **maximum system protection**
- High dirt-holding capacity for **long life** and **economy** to the user
- Rugged construction for resistance to extreme dynamics in system pressure and fluid surge flow variations
- High quality, durable adhesive used to bond the endcaps to the media, and to bond the seam of the media
- High beta stability through the life of the element

HYDAC quality BETAFIT® Filter Elements are designed for high performance and long life.

PRICE AND VALUE

Initial cost is an important factor, so we price our BETAFIT® Filter Elements competitively. However, **HYDAC** recommends that careful consideration be given to the **long-term** cost savings resulting from elements having exceptional efficiency and dirt-holding capacity, thus, resulting in well controlled fluid cleanliness levels. When measured on the basis of performance to price, **HYDAC** products offer a superior value.

PROVEN PERFORMANCE & QUALITY MANUFACTURING

HYDAC designs, manufactures, and tests a large number of absolute-rated filter elements at our headquarter plant in Bethlehem, PA. Through active product development efforts, **HYDAC**, where quality is the standard, continually seeks to improve performance of existing elements and continues to expand our comprehensive line of element interchanges.

Recognizing that filters operate under harsh dynamic conditions and that system and component failures may be disastrous to your equipment, **HYDAC** follows strict Quality Control practices and maintains wide design safety margins in the manufacture and application of **HYDAC** products and services.

RANGE OF PRODUCTS

HYDAC provides a wide range of cartridge filter elements, spin-on elements, air-breathers, and suction strainers — and can interchange many filter elements made by competitive filter manufacturers.

As a result, many companies find that converting to **HYDAC** BETAFIT® elements allow them to consolidate purchases, reduce inventory, and reduce system component replacement and maintenance costs, while enjoying superior performance.

AVAILABILITY

HYDAC stocking distributors, located throughout the U.S. and Canada, offer support with local inventory and selection assistance. **HYDAC** supports their distributors with an additional stock of BETAFIT® interchange elements, most of which are produced at the **HYDAC** plant in Bethlehem, PA. If our customers require support outside of North America, **HYDAC** will make arrangements through the worldwide distribution network of **HYDAC** Germany.

SELECTION PROCEDURE

To select a BETAFIT® interchange, one needs to determine their current filter manufacturer's element model code, and match it to the corresponding **HYDAC** model code in the pages that follow. Manufacturers are listed in alphabetical order. Your **HYDAC** distributor will be glad to review your current usage and recommend a suitable interchange.

The BETAFIT® interchange element information contained in this guide is furnished for the convenience of our customers and is as accurate as possible at the time of publishing. However, **HYDAC** makes no guarantee, either expressed or implied, to the accuracy of its interchange information. For critical applications, please consult **HYDAC**.

Please Note:

Model codes for **HYDAC** proprietary elements have not changed and no older model codes will be shown.

Filtration Solutions For Mobile Equipment

Although there is great diversity in mobile equipment designs, the common demand in the industry for improved performance has resulted in systems growing in complexity and cost. Precision hydraulic components – *variable displacement pumps and motors, load control valves, and proportional controls* – are increasingly applied to enhance machine power, speed and versatility. Higher operating pressures – in excess of 6,000 psi – are increasing in usage in order to generate higher force and torque from a smaller and lighter package. As fluid power systems are built to function more precisely at higher pressures, protection against wear and malfunction becomes vital. **HYDAC's** range of filtration products are designed to provide the necessary level of protection to maintain the efficiency, useful life and safety of high performance fluid power systems.

BETAMICRON® 3 Plus High Technology Filter Elements

HYDAC manufactures high quality absolute-rated filter elements with beta ratios ≥ 200 . This catalog details the features and benefits of these elements, and contains the results from comparative testing done between **HYDAC** Betamicon 3 Plus elements and elements made by other manufacturers. See the proof for yourself as to why **HYDAC** Betamicon 3 Plus Elements are the right choice when it comes to protecting your hydraulic systems and equipment.

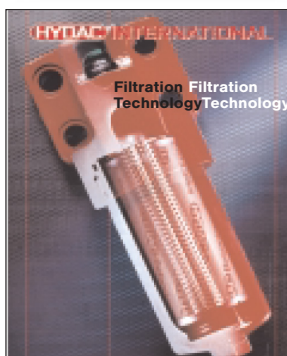

Request catalog # 02068161

Condensed Filter Catalog

This condensed catalog serves as a quick reference guide for selecting **HYDAC** filters. The models are divided into high, medium, and low pressure groups. Charts then describe each filter in the group. Each model description includes mounting method, maximum operating pressure, maximum flow rates, number of sizes and connection size range, flow path, clogging indicator type, and a brief description of features and benefits. General information about clogging indicators, element types, breathers, and filler breathers is also included.

Request catalog # 02068118

Filtration Technology

HYDAC Filter Technology is the result of many years of research, development and performance evaluation both in test stands and actual applications. **HYDAC's** **Filter Division** produces a complete range of filters. This range includes in-line, in-tank, inside-tank, direct mount, and manifold mount, modular stacking filters. Also available are duplex models for systems requiring continuous operation. This catalog provides a general overview and photos of **HYDAC** filter families with information on pressure and flow ratings, and mounting types. It serves as a handy reference to select the appropriate series of filter(s) for the application in need of filtration. More detailed literature that includes specific technical data and dimensioned drawings is available for all models.
