

RE 29224

Edition: 2024-01 Replaces: 11.07

# **Supply pressure compensator, direct operated**

### **Type ZDC**

- ▶ Size 10 ... 32
- ► Component series 2X
- ► Maximum operating pressure 350 bar
- ► Maximum flow 520 l/min

#### **Features**

- ► Sandwich plate valve
- ▶ Porting pattern according to ISO 4401
- ▶ Load compensation in channel  $P \rightarrow A$  or  $P \rightarrow B$  by integral shuttle valve
- ▶ 2-way version "P"
- ▶ 3-way version "PT" (NG10 ... 25)
- ► Flow control in case of interaction with proportional directional valve
- ► Corrosion-protected design

**Symbols:** 3-way version "PT" (① = component side, ② = plate side)

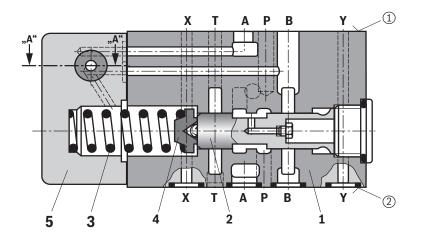

#### **Function**, section

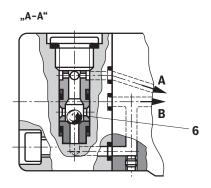

Valves of type ZDC are direct operated supply pressure compensators available in a 2- or 3-way version. They are used for the load compensation as supply pressure compensators in channel P.

These valves basically consist of the housing (1), the control spool (2), compression spring (3) with spring plate (4) and the cover (5) with installed shuttle valve (6).

The compression spring (3) keeps the control spool (2) in open position of P2 $\rightarrow$ P1 if the pressure differential P1 $\rightarrow$ A1 or P1 $\rightarrow$ B1 is below 10 bar.

If the pressure differential exceeds 10 bar, the control spool (2) is moved to the left until the pressure differential is restored again.

5/20

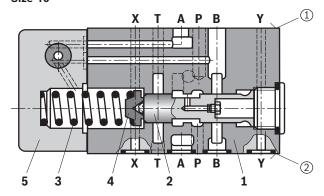

Supply pressure compensator | ZDC

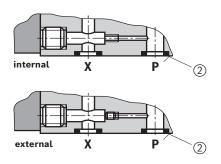

#### Pilot oil supply

With **external** pilot oil supply, the connection to channel P is blocked. The pilot oil is sampled from a separate control circuit.

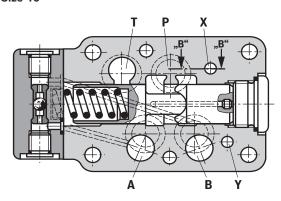

With **internal** pilot oil supply, the connection to channel P is open. The pilot oil is sampled upstream the throttle side of the pressure compensator (port X in the subplate is blocked).

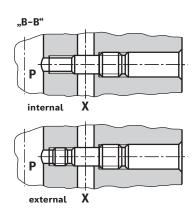

Size 10

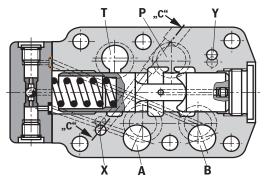

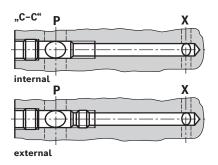

Size 16

Size 25

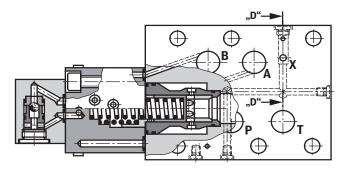

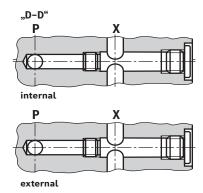

#### Pilot oil supply

#### Size 32

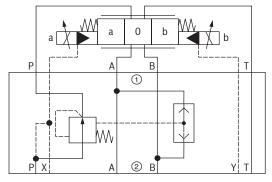

#### M Notice:

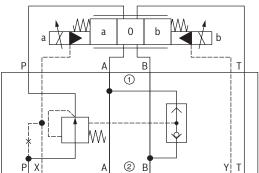

In connection with the supply pressure compensator, the pilot-operated proportional directional valve is to be used with **external pilot oil supply**.

#### **Examples**

Supply pressure compensator version "ZDC . P" with proportional directional valve type 4WRZ

Supply pressure compensator version "ZDC . P.X" with proportional directional valve type 4WRZ

	Port T	bar	250			
	Port X	bar	30 100			
	Port Y	bar	150 (up to 30 in connection with pilot-operated proportion directional valve)			
Hydraulic fluid			See table page	8		
Hydraulic fluid temperature rar	nge	°C	-20 +80 (NBI -15 +80 (FKN	,		
Viscosity range mm²			15 380			
Maximum admissible degree or hydraulic fluid; cleanliness clas			Class 20/18/15	1)		
Maximum flow		l/min	85	150	325	520

The cleanliness classes specified for the components must be adhered to in hydraulic systems. Effective filtration prevents faults and at the same time increases the life cycle of the components.

		HFDR	FKM		
	► Containing water	HFC (Fuchs: Hydrotherm 46M, Renosafe 500; Petrofer: Ultra Safe 620; Houghton: Safe 620; Union: Carbide HP5046)	NBR	ISO 12922	90223

#### Important information on hydraulic fluids:

- ► For further information and data on the use of other hydraulic fluids, please refer to the data sheets above or contact us.
- ► There may be limitations regarding the technical valve data (temperature, pressure range, life cycle, maintenance intervals, etc.)
- ► The ignition temperature of the hydraulic fluid used must be 50 K higher than the maximum surface temperature.
- ▶ Bio-degradable and flame-resistant containing water:

  If components with galvanic zinc coating (e.g. version "J3" or "J5") or parts containing zinc are used, small amounts of dissolved zinc may get into the hydraulic system and cause accelerated aging of the hydraulic fluid. Zinc soap may form as a chemical reaction product, which may clog filters, nozzles and solenoid valves particularly in connection with local heat input.

#### ► Flame-resistant - containing water:

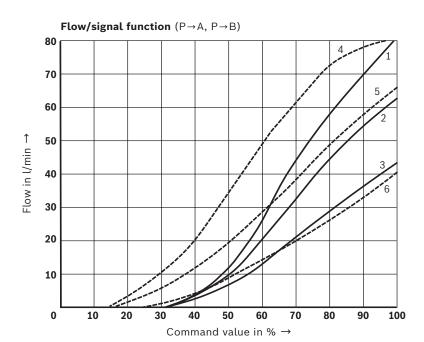

Due to the increased cavitation tendency with HFC hydraulic fluids, the life cycle of the component may be reduced by up to 30% as compared to the use with mineral oil HLP. In order to reduce the cavitation effect, it is recommended – if possible specific to the installation – backing up the return flow pressure in ports T to approx. 20% of the pressure differential at the component.

**Dimensions:** Size 10 (dimensions in mm)

Required surface quality of the valve contact surface

- 1 Name plate
- 4 Identical seal rings for ports A, B, P, T; Identical seal rings for ports X, Y (plate side)
- **5** Porting pattern according to ISO 4401-05-05-0-05
- 6 Valve mounting bores

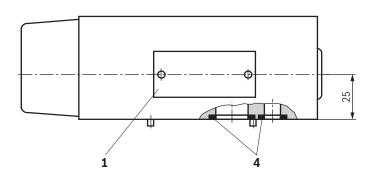

Valve mounting screws (separate order)
4 hexagon socket head cap screws ISO 4762 - M6 - 10.9

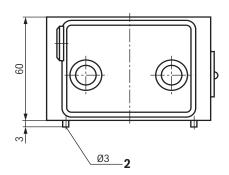

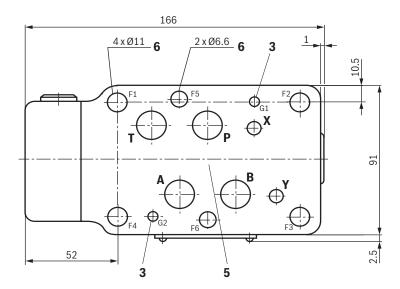

Length and tightening torque of the valve mounting screws must be calculated in connection with the components mounted underneath and above the sandwich plate valve.

**Dimensions:** Size 16 (dimensions in mm)

Required surface quality of the valve contact surface

- 1 Name plate
- 2 Locking pin
- 3 Bore for locking pin
- 4 Identical seal rings for ports A, B, P, T; Identical seal rings for ports X, Y (plate side)
- 5 porting pattern according to ISO 4401-07-07-0-05
- 6 Valve mounting bores

Valve mounting screws (separate order)

- 4 hexagon socket head cap screws ISO 4762 M10 10.9
- 2 hexagon socket head cap screws ISO 4762 M6 10.9

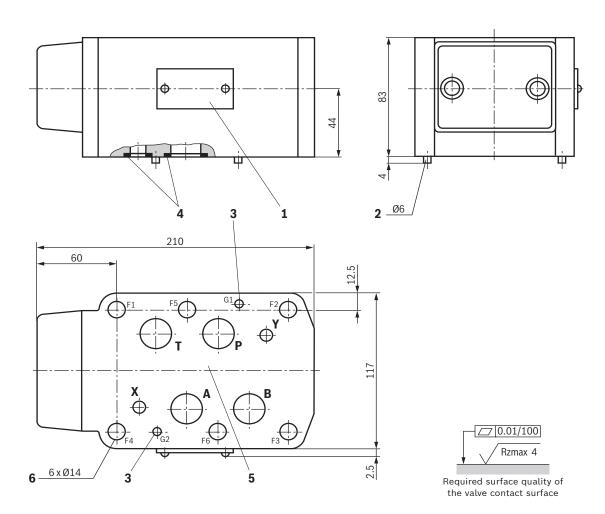

Length and tightening torque of the valve mounting screws must be calculated in connection with the components mounted underneath and above the sandwich plate valve.

Supply pressure compensator | **ZDC** 15/20

**Dimensions:** Size 25 (dimensions in mm)

- 1 Name plate
- 2 Locking pin
- 3 Bore for locking pin
- 4 Identical seal rings for ports A, B, P, T; Identical seal rings for ports X, Y (plate side)
- 5 Porting pattern according to ISO 4401-08-08-0-05
- 6 Valve mounting bores

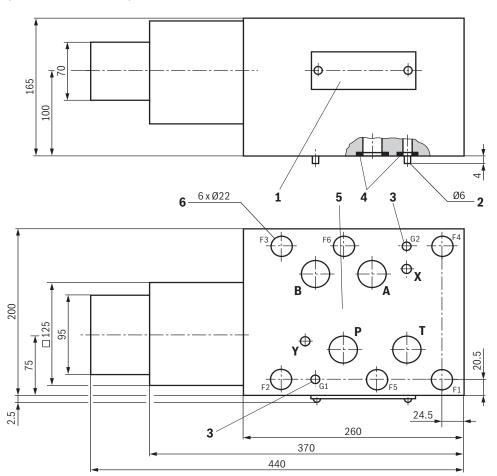

Valve mounting screws (separate order)
6 hexagon socket head cap screws ISO 4762 - M12 - 10.9

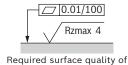

Length and tightening torque of the valve mounting screws must be calculated in connection with the components mounted underneath and above the sandwich plate valve.

**Dimensions:** Size 32 (dimensions in mm)

the valve contact surface

- 1 Name plate
- 2 Locking pin
- 3 Bore for locking pin
- **4** Identical seal rings for ports A, B, P, T; Identical seal rings for ports X, Y (plate side)
- **5** Porting pattern according to ISO 4401-10-09-0-05
- 6 Valve mounting bores

Valve mounting screws (separate order)
6 hexagon socket head cap screws ISO 4762 - M20 - 10.9

Length and tightening torque of the valve mounting screws must be calculated in connection with the components mounted underneath and above the sandwich plate valve.
