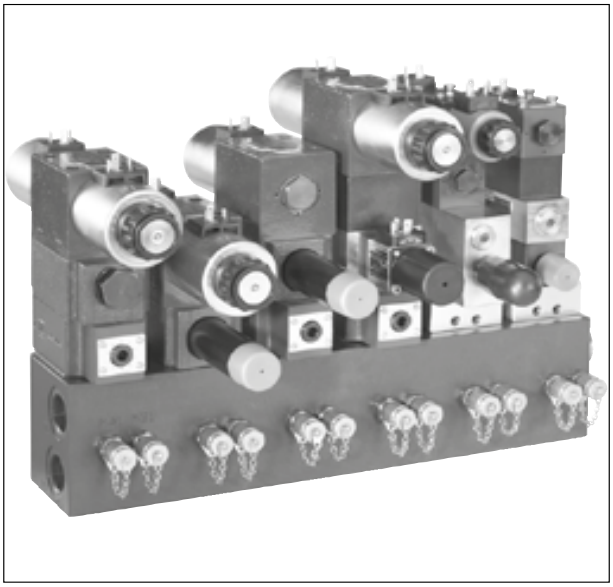
Edition: 2022-04
Replaces: 2018-05

rexroth
A Bosch Company

Manifolds

Type HSR 10



- Size 10
- Component series 15 and 35
- Maximum operating pressure 315 (350) bar
- 1 to 8 stations

Features

- Base element for ready-for-connection controls in vertical stacking design
- Compact hydraulic controls
- Common pump line
- Common tank line
- Separate actuator ports of the stations
- Optional measuring ports in the actuator lines
- Mounting of NG10 sandwich plates and valves
- Mounting of NG6 sandwich plates and valves possible by means of an additional adapter plate

Types

08	Standard	**no code**
	With measuring ports in A and B	**SO8** [1]

Coating

09	Phosphate coating DIN EN ISO 9717	**PHOSPHATED** [2]
	Galvanic coating DIN EN ISO 19598	**FE//ZN8//CN/T0**

[1] Not possible with series 15 with lateral actuator ports
[2] Standard version (manganese or zinc phosphate coating)
[3] Only for series 3X, standard and SO8 versions. Others upon request

Description

- Manifolds are the base element for ready-for-connection controls in vertical stacking design
- Manifolds of NG10 are available with 1 to 8 stations
- On each station, highly compact hydraulic controls can be build using vertically stackable sandwich plate valves in connection with shift valves or proportional servo valves of NG10 or NG6 (adapter plate required).
- All stations have a common pump port and a common tank port
- The pump line "P" and the tank line "T" are lead through the two front sides of the manifold
- Every station is equipped with separate actuator ports "A" and "B"
- Actuator ports are either located at the bottom or laterally
- Another option are measuring ports in the actuator channels "A" and "B"

Order example for a manifold with galvanic coating, approved for 350 bar:
Manifold 7HSR10-35/01D/350 SO8 FE//ZN8//CN/T0

Technical data

(For applications outside these values, please consult us!)

General		
Size		10
Material		GGG40
Surface coating		Phosphate coating [1] according to DIN EN ISO 9717 with after-treatment (greases, oils, lubricants) Galvanic coating according to DIN EN ISO 19598 – Galvanized and thick film passivated
Hydraulic fluid		Hydraulic oils HL, HLP, HVLP according to DIN 51524 For further information refer to data sheet 90220. For other hydraulic fluids, please contact us
Maximum operating pressure [2]	bar	See tables on page 3 ... 6

[1] Manganese or zinc phosphate coating

[2] Manifold without valve fitting

Notice:
For the assembly, commissioning and maintenance of hydraulic systems, see data sheet 07900

Mounting screws depending on valve fitting

Screw selection table for vertical stacking in combination with size 10 directional valves

Number of sandwich plates	Clamping lengths Sandwich plates	Hexagon socket head cap screws according to ISO 4762; stud screws according to DIN 939		Stability	Material no.
1	1 x 50 mm	M6 x 90	ISO 4762	10.9	R913048089
2	2 x 50 mm	M6 x 140	ISO 4762	10.9	R913043041
3	3 x 50 mm	M6 x 190	DIN 939	10.9	R913024015
4	4 x 50 mm	M6 x 240	DIN 939	10.9	R913024017
5	5 x 50 mm	M6 x 295	DIN 939	10.9	R913024018
For the torques of the screws, please refer to the corresponding data sheets of the valves					

☞ **Notice!**
- The clamping lengths of the mounted sandwich plates and valves must be checked for each individual case.

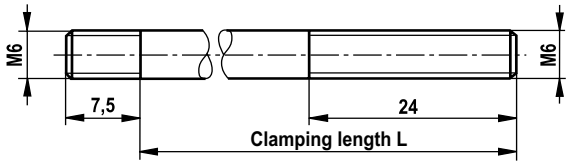
Example for mountable sandwich plates with a clamping length of 50 mm:
Pressure reducing valve ZDR 10 D...5X/... (data sheet 26585), pressure relief valve ZDB 10...4X (data sheet 25761), Twin check valve Z2S10...-3X/... (data sheet 21553), check valve Z1S10...4X/... (data sheet 21537), twin throttle check valve Z2FS10...3X/..., pressure switch with sandwich plate HED8OH-2X/... (data sheet 50061)

Directional valve	Hexagon socket head cap screws according to ISO 4762;		Stability	Material no.
direct operated directional valve WE 10	M6 x 40	ISO 4762	10.9	R913051533
pilot operated directional valve WEH 10	M6 x 45	ISO 4762	10.9	R913043777
direct operated proportional valve WRA 10, WRE 10	M6 x 40	ISO 4762	10.9	R913051533
pilot operated proportional valve WRK 10, WRZ 10	M6 x 45	ISO 4762	10.9	R913043777
For the torques of the screws, please refer to the corresponding data sheets of the valves				

☞ **Notice!**
- The screw selection table does not apply to directional valves in their seawater-protected version due to differences in the clamping lengths on the directional valve (dimensions see data sheets – seawater-protected directional valves).

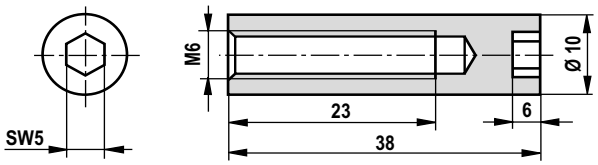
☞ **Notice!**
- Directional valves with central ports "D", "DL", "DZ" and "DZL" can only be used with hexagon socket head cap screws or stud screws and round nut according to ZN 10035, material no. R913020310.

Stud screw M6 DIN 939, property class 10.9



L see screw selection table

Round nut ZN10035-M6-ST, material no. R913020310



Project planning information

Pressure reducing valve in connection with double check valve
The pressure reducing valve ZDR..DA (pressure reduction in channel A) **must** always be installed between the directional valve and the double check valve Z2S... This ensures that the double check valve can block in a leak-free manner.

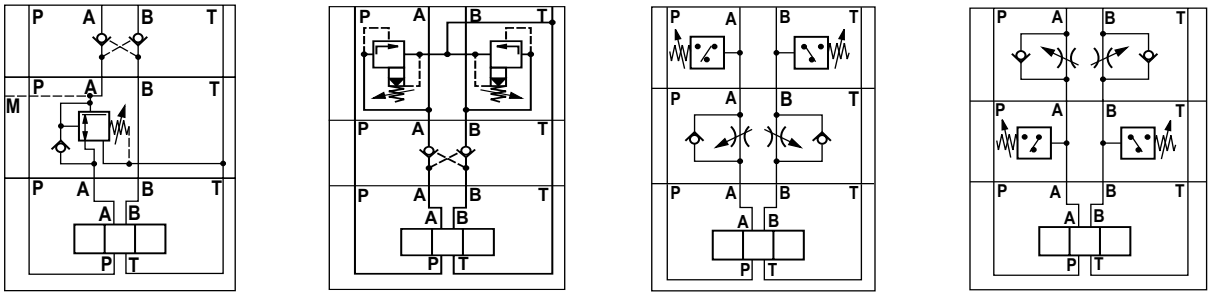
Pressure relief valve in connection with double check valve
Leak-free blocking of the actuator is **not** possible if a pressure relief valve ZDB../Z2DB.. is effective in channel A and/or B and a double check valve is installed.

Notice!
The installation of sandwich plates with two pressure switches on manifolds with lateral ports "C" is **not possible**.

Pressure switches in connection with twin throttle check valve

Supply control
The pressure switch HED 8 OH, effective in channel A and/or B, is installed between the subplate and the twin throttle check valve Z2FS.

Discharge control
The pressure switch HED 8 OH, effective in channel A and/or B, is installed between the directional valve and the twin throttle check valve Z2FS.

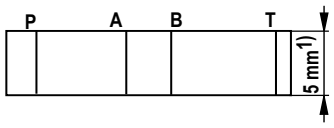


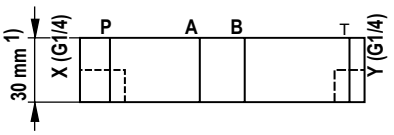
The illustrated sections of circuit diagrams are examples. The project planning information must also be observed for valves with a similar function.

Sandwich plate (with or without separate port X, Y) **for use with pilot operated valve**

Notice!
When using pilot operated valves to seal channels X and Y on manifold version "C" (lateral actuator ports), the sandwich plate with material no. **R900320784** (NBR) or **R900321346** (FKM) is required!

Notice!
For all designs, the external pilot oil supply is only possible if the sandwich plate with material no. **R900320785** (NBR) or **R900321347** (FKM) can be used!





1) Plate clamping length

Notice:
Due to the valves and sandwich plates with "excessive width", some through holes for the fixation of the manifold cannot be used. The end user is responsible for evaluating, assessing and taking the responsibility with regard to the decision whether the mounting screws in these positions can be renounced.
Possible countermeasures may include:
- Use of a narrower distance plate under the broader valves and sandwich plates e.g.: R900516529 Sandwich plate HSZ 06 A003-3X/M00
- Exchanging the order of the sandwich plates of the individual vertical stackings unless this impairs the function.
- It may possibly also be useful to change the order of the vertical stackings.

Alternatively, you can use available mounting threads for the fixation.

Selection of available subplate-mounted valves

Sandwich plates NG10	Data sheet
Sandwich plates HSZ	48052
Pressure reducing valve ZDR	26585
Pressure relief valve ZDB	25761
Double check valve Z2S	21553
Check valve Z1S	21537
Twin throttle check valve Z2FS	27518
Pressure switch HED8	50061

Adapter plate NG10	Data sheet
HSE	48045

Cover plate NG10	Data sheet
HSA	48042

Directional valves size 10	Data sheet
WE (electrically operated)	23327
WMM, WP and WN (mechanically, manually, fluidically operated)	22334
WEH (pilot operated)	24751 [1]

Proportional valves size 10	Data sheet
WRA (direct operated, without feedback)	29055
WRE (direct operated, with el. feedback)	29061
WRZ/WRH (pilot operated without feedback)	29115 [1]

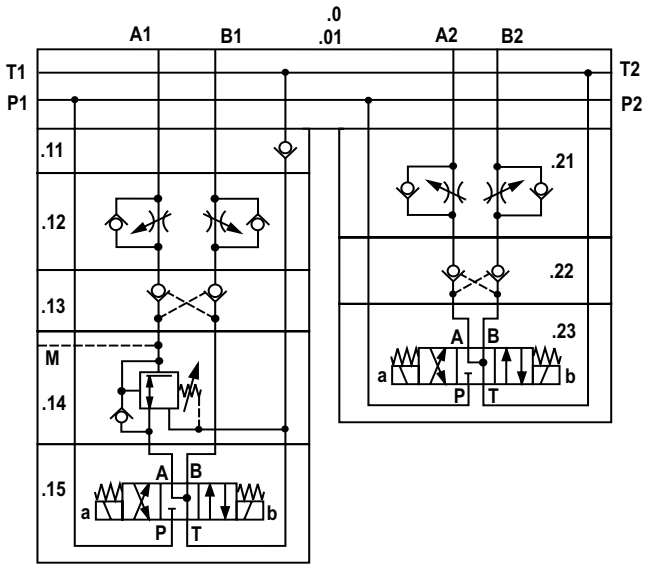
[1] Observe notice on page 16

NG = size

If adapter plates are used, valves of other sizes can also be mounted.

Required ordering code of a completely mounted manifold

Example:
2-fold manifold



Position	Quantity	Device designation	Type designation	Material no.
.0	1	Manifold	2HSR 10 C1X/... [1]	[1]
.01	1	Manifold	2HSR10-35/01C/350 SO8 PHOSPHATED	R901552924

	4	Stud screw	M6 x 240-10.9 DIN 939	R900024864
	4	Round nut	Round nut ZN10035-M6-ST	R913020310
.21	1	Twin throttle check valve	Z2FS 10-5-3X/V	R900517812
.22	1	Double check valve	Z2S 10-2-3X/	R900421985
.23	1	Directional valve	4WE10 J5X/EG24N9K4/M	R901278744
	4	Hexagon socket head cap screw	M6 x 140-10.9 DIN 912	R913043041

[1] Material number and type designation are determined by the plant or the manifold configurator

Bosch Rexroth AG, RE 48110, edition: 2022-04

The manifold configurator on www.boschrexroth.com/ics/hsr

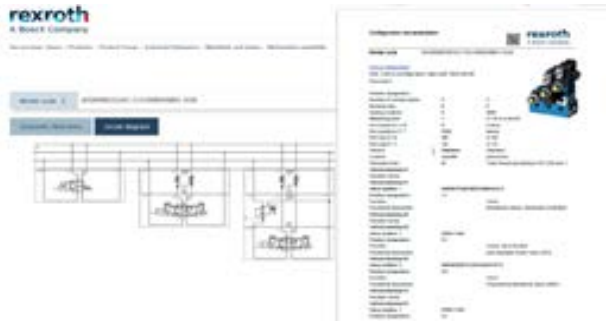
The configurator for manifold type HRS helps you configure your individual manifold or vertical stacking type HSH in a simple and convenient way.
You can do this online by selecting relevant features of the base element (e.g. size, number of stations and port size) and the mounted product components (e.g. size, pressure, type of actuation).

☞ **Notice:**
The configurator cannot be used for unfitted plates.

☞ **Notice:**
Tutorials for operating the configurator can be found at: https://bit.ly/3onTqoZ

Thanks to the intuitive menu navigation, you are guided safely through the required configuration steps.
Related features are clearly arranged on one page.
By connecting components from various product areas, you can choose from a range of approx. 1000 different functions.

The individual components are selected either by type code or by material number using a configuration based on the circuit diagram or a "step by step" selection of the individual functional properties of the valve or the sandwich plate.



When the configuration is complete, a collision check offers various possibilities of fixing existing collisions.
When the configuration is finished, you can have the complete configuration documentation sent to you via email including material list, circuit diagram, 2D drawing and 3D model (STEP). This is done by way of an automatic request to your local distributor who will promptly contact you and send you an offer.
