APPLICATIONS:

Similar to an L bushing, but with a head to resist heavy axial loads. Head liners are permanent bushings used to hold renewable drill bushings. The head liner's ID has a precise sliding fit with the renewable bushing's OD. The hardened head liner accurately locates the renewable bushing and protects the jig plate from wear caused by frequent bushing replacement. Note: The "length" listed for a head liner refers to its overall length, not its length under the head. Metric head-liner bushings are the same as metric head-press-fit bushings.

ORDERING EXAMPLES:

HL-32-16	Standard inch liner bushing
HL-32-16U	Unground OD
HM-18-25-12.00	Standard metric liner bushing (same as metric press-fit type)
