

LOCKING-PIN BUSHINGS

PRESS FIT: 1144 STEEL, CASE HARDENED, BLACK OXIDE FINISH
 THREADED: 1215 STEEL, CASE HARDENED, BLACK OXIDE FINISH

Locking-Pin Bushings are equipped with a retainer spring clip on the inside diameter. These bushings are used with all types of locking/captive pins and locating screws. Available for pin diameters 3/16 to 1/2" (6 to 12mm in metric). Some bushings are available in a choice of lengths, to suit thinner or thicker plates. Several bushing sizes are optionally available with an oversize ID (.040" larger), for applications with multiple pins where additional clearance is desired to prevent binding. Locking-Pin Bushings are designed to press fit in a standard reamed hole. Secure with a Lockscrew to positively hold the bushing in place – order separately as part number LS-1 (inch) or LSM-3 (metric).

Also available in threaded version!

Locking-Pin Bushings are now optionally available with a threaded OD, for installation in a tapped hole. This version is designed for use with clamping pins in non-locating applications, with an ID size .040" over nominal size.
