Zero point clamping system

SPEEDY easy click 1

SPEEDY easy click - engages immediately without an energy supply

Click - and holds

The new SPEEDY easy click is a mechanical fast closing clamp that needs no energy supply to engage and hold immediately.

You require a supply of compressed air at 3-8 bar to release.

SPEEDY easy click is used in cutting and non-cutting multi-axis machining.

The short clamping time allows it to be used as a construction element in production lines.

A particularly compact design allows narrow spacings, retractable nipples only 12 mm long and short extraction distances.

Oil-free applications, e.g. in the foodstuff industry, medical or chemical sectors, extend the field of use.

Installation variants

Flush mount:

Positioned by Ø85

Flange:

Positioned by two pins Ø8

Flange:

Positioned by two pins Ø8 Indexed by sword-shaped pin in pallet (single mounting)

Flange

Positioned by two pins Ø8 Indexed by hole in pallet (single mounting)

Connection:

by threaded fitting M5

Connection:

O-ring

SPEEDY easy click		
Order no.		7000 019
Maintenance interval Cycles	250,000	
Clamping force ¹	[N]	5,000
Retention force ²	[N]	10,000
Click-on force	[N]	80
Repeatability ³	[mm]	< 0.01
Release pressure	[bar]	3-8
Lateral forces max. permissible	[N]	2500
Max. operating pressure	[bar]	8
Preset clamping time	[s]	< 0.1
Preset release time	[s]	approx. 0.1
Nipple pre-positioning radial	[mm]	±1
Temperature range	[°C]	+10 to +80
Air volume	[cm ³]	8 releases
Filter class		Quality class 4
Weight	[kg]	0.62
Automatic loading		at stop

Clamping force Clamping force refers to the load up to which the zero point is guaranteed. The clamping force stated must not be exceeded. Due to the adjustable clamping force, there is a maximum.

mum, at the maximum clamping pressure (see table below).

Retention force
Retention force refers to the max. overload up to which the nipple will continue to be retained, but the zero point has already been left (designed for M10 screw).

³ Repeatability Repeatability refers as a rule to the accuracy with which the same pallet in a specific orien-

tation is changed on the same interface.

Zero point clamping system

Function description SPEEDY easy click -

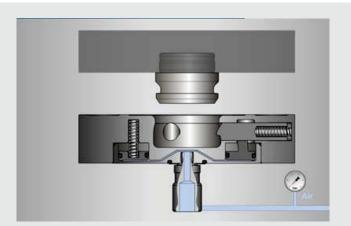

positioning and clamping in one function

Principle of operation:

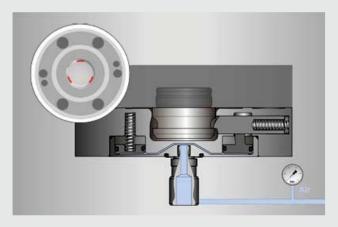

See the whole process at www.stark-inc.com

<u>SPEEDY easy click basic setting:</u> The system is depressurised.

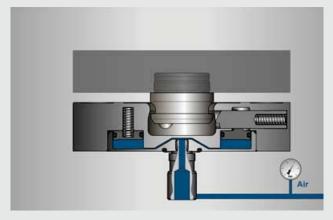

SPEEDY easy click engage:

The pallet is directly clicked on when it is fed in. It is also always possible to insert the nipple when the system is pressurised. When depressurised the pallet is clamped by spring force.

<u>SPEEDY easy click release:</u> Pressure (3-8 bar) is applied to the system and the pallet can be removed.

Zero point clamping system

SPEEDY easy click

- Module
- Round
- Indexing

Characteristics:

Flush Mount fast closing clamp module made of high-quality stainless tool steel.

A mechanical fast closing clamp engages immediately without an energy supply and holds, release with 3-8 bar air pressure. Compact design requires little space and allows narrow spacings. SPEEDY easy click can be installed as a module in pallets or directly into the machine table. The mechanical engagement system makes SPEEDY easy click ideal as a robot gripper in automation engineering. Integrated query options and oil-free operation extend the range of applications.

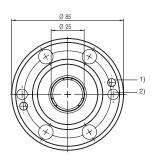

Application:

For flush mounting in machines, machine pallets, plates, angles, cubes, mounting towers and swivelling yokes.

Machine element:

Can be used for all common machining tasks such as milling, grinding, eroding as well as on test stands and mounting devices.

1) Draw-off thread M6 for demounting 2) Positioning through hole Ø8

Order no.	Retention force	Clamping force	Pressure max. *	Weight	Datasheet
7000 010	10.000NI	5 000NI	3 Shar	0.62kg	D113

Fastening screws and screw covers are included items.

Zero point mounting

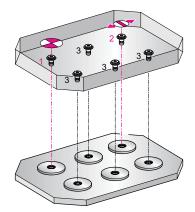

3)

- 1) Retractable nipple with zero point
- 2) Retractable nipple with equaliser
- 3) Retractable nipple

Retractable nipple with zero point on the top left corner of the pallet

Application:

Equalisation of thermal expansion and manufacturing tolerances.

Sales partner

Zero point clamping system

Retractable nipple

With zero point

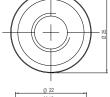

Characteristics:

Retractable nipple with zero point.

Application:

For positioning and clamping on machine pallets, machine vices, chucks, jigs, direct workpiece clamping.

Order no.	Screw quality		Tightening torque M12 DIN 912	Weight	Datasheet
7000 100	min. 10.9	45Nm	60Nm	0.046kg	D110

Retractable nipple —

With equaliser

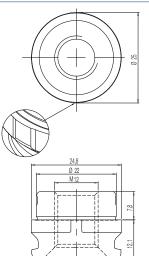

Characteristics:

Retractable nipple with equaliser on one axis (sword shape).

Application:

For positioning and clamping on machine pallets, machine vices, chucks, jigs, direct workpiece clamping.

Order no.		Tightening torque M10 DIN 7991	Tightening torque M12 DIN 912	Weight	Data sheet
7000 101	min. 10.9	45Nm	60Nm	0.046kg	D110

Retractable nipple

without centring

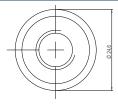

Characteristics:

Retractable nipple without centring.

Application:

For positioning and clamping on machine pallets, machine vices, chucks, jigs, direct workpiece clamping.

Order no.	Screw quality	Tightening torque M10 DIN 7991	Tightening torque M12 DIN 912	Weight	Datasheet
7000 102	min. 10.9	45Nm	60Nm	0.046kg	D110
