

Pressure Switch EDS 4400 Ex series applications

Flameproof enclosure
ATEX, CSA, IECEx, triple approval
Customised designs thanks to diverse
electrical and mechanical connections
Up to 2 switching outputs

Description:

The electronic pressure switch EDS 4400 with flameproof enclosure and triple approval acc. to ATEX, CSA and IECEx ensures the instrument is universally suitable for use in potentially explosive atmospheres worldwide.

Each instrument is certified by the three approvals organizations and is labelled accordingly. Therefore there is no longer any need to stock multiple devices with separate individual approvals. The switch point and switch-back point, the function of the switching outputs as N/C or N/O and the switching delay are factory-set acc. to customer requirement (not field-adjustable).

As with the industry model of the EDS 4400, those with triple approval have a proven, fully-welded sensor cell with a thin-film strain gauge on a stainless steel membrane without internal seal.

The main fields of application are in mining and the oil and gas industry, e.g. in underground vehicles, hydraulic assemblies, blow-out preventers (BOPs), drill drives or valve actuation stations and in locations with high dust contamination.

Order details:

The electronic pressure switch EDS 4400 with triple approval has been specially developed for OEM customers and is available for minimum order quantities of 50 units per type. For precise specifications, please contact the Sales Department of HYDAC ELECTRONIC.

Note:

The information in this brochure relates to the operating conditions and applications described. For applications or operating conditions not described please contact the relevant technical department. Subject to technical modifications.
