

Filtromat OF 5 mobile

Description

The filtration unit OF 5 mobile is designed to fill hydraulic tanks (whilst filtering the fluid). It can also filter offline and pump hydraulic and lubrication oils out of hydraulic tanks (without filtration).

In the OF 5 CM design, the unit represents an ideal all-in-one solution for measuring particle contamination and water ingress in the hydraulic fluid. The integral air bubble suppression system prevents CS1000 measurement errors caused by air bubbles. As an option, other condition monitoring sensors such as the HYDAC AquaSensor can be incorporated to measure water in oil.

Applications

- Hydraulic and lubrication oil systems in a variety of industries

Advantages

- Convenient offline filtration
- Simple to operate
- Greater system availability
- Reduction of Life Cycle Cost LCC
- Filtration and fluid monitoring (optional) in one device
