

Filtromat OF 5 with FCU

Description

The mobile filtration unit OF 5 is designed to fill/filter hydraulic & lubrication tanks and to filter offline whereby the contamination can be monitored. It is also designed for pumping out unfiltered hydraulic and lubrication oils, and draining hydraulic tanks.

The built-in FluidControl Unit FCU 2000 measures the particle contamination and monitors the oil cleanliness.

Applications

- Hydraulic and lubrication oil systems in a variety of industries

Advantages

- Convenient filtration in bypass flow
- Simultaneous monitoring of the particulate contamination
- Simple handling
- Increased system availability
- Reduction of life cycle costs LCC
