

## Lockable Filling / Breather Filters BF / ELFL 30

### Description

The lockable breather filter (BF 30) and the filling / breather filter (ELFL 30) provide reliable protection against vandalism in cases where the breather filter is not covered by the bonnet. There is a one-key principle implemented, i.e. one key fits both the cabin and the breather lock.

The filling breather design ELFL 30 combines a BF 30 lockable with a corresponding tank strainer.

### Technical Data:

- Sizes: BF 30 / ELFL 30
- Response pressure check valve: 0,2 bar
- Temperature range: -30 up to 100°C
- ELFL = BF expanded by tank strainer
- Material: plastic

### Product Advantages

- Reliable protection against vandalism
- One-key-solution
- Pre-charging of the tank is possible
- Light weight
