

WHEELED MACHINE SKATES

MOVE AND POSITION LOADS UP TO 32 TON

MLS-SERIES

ENERPAC 

▼ **MLS-Series, Wheeled Machine Skates**

- Durable polyurethane or optional nylon wheels provide excellent stability while preventing damage to finished floors
- Rugged, reliable bearings and wheels deliver low rolling resistance
- Low height requires minimal lifting to accommodate moves
- MLSF steerable skates improve maneuverability with turntables that can easily rotate under the load, ideal for general applications
- For ultimate versatility, MLSR rotational skates provide 360 degrees of directional movement, ideal for confined space applications
- Models pre-assembled with nylon wheels are available upon request
- Configure MLSR sets with a handle and connecting bar to meet your application requirements.

Nylon Wheel Kits

Nylon wheel kits are available for better wear resistance or if increased capacity is required.

		MLSF27, MLS27	3
		MLSF35, MLS35	4

DESIGNED FOR INDUSTRIAL MACHINE MOVERS AND MILLWRIGHTS

Connecting Bars

Connecting bars come standard with MLSD-models. Different lengths of connecting bars are available to connect MLSR-models together.

Handles

MLSF-models come standard with size-specific handles. Optional manual or pulling eye handles are available for MLSR-models.

Optional Turntable Assembly

Available for MLSR-Rotational Skates. The turntable provides an additional 37 mm of height.

An Enerpac MLS-Series machine skate set combined with a low-height hydraulic cylinder provides the ideal package for heavy machinery moves. ►

Wheeled Machine Skates

Selecting the Right Skate Set

MLS-Series Machine Skates offer easy and stable movement across various floor types.

MLSS-sets (consisting of MLSF and MLSD-skates) are a great option for most maneuvers, especially when confined space is not a concern.

MLSR-rotational skates have the highest level of maneuverability for easy moves in tight spaces and around corners.

Combining MLSR-models with connecting bars and handles provides a versatile set to cover more applications.

For ordinary concrete floors consider the ER-Series Chain Roller Machine Skates.

EMLS, EMV-Series, Battery-Powered Machine Skates

Remote-controlled, heavy-duty machine moving system up to 50 ton for clean and even surfaces.

Lifting Wedges & Machine Lifts

To place Machine Skates, the load must first be lifted. This can be done using the LW-Series Enerpac Lifting Wedge or SOH-Series Machine Lifts.

ER-Series, Chain Roller Skates

Enerpac has an alternative offering of steel chain roller style machine skates for moving loads up to 80 ton.

THE RIGHT TOOL MAKES ALL THE DIFFERENCE

The large and heavy objects that our lifting and positioning products are designed to manage are all extremely valuable and often irreplaceable pieces of equipment. Control and safety is paramount, especially when distributing the load over multiple lifting points. To ensure that synchronisation is guaranteed, Enerpac offers a range of intelligent lifting systems. These complete your heavy lifting solution, allowing you to work in a safe, professional and efficient manner. We are passionate about solving your challenges, together.
