Knowledge is POWER - Motion Force Control is our Business HYQUIP Limited New Brunswick Street Horwich Bolton Lancashire BL67JB UK

RE 50056

Edition: 2016-09 Replaces: 09.15

Features

- ▶ 4 pressure ratings
- Electrical connection
- with large cubic connector
- Micro switch with NC/NO contact function
- ▶ Potential-free switching of currents from 1 mA to 2 A
- ► UL approval
- CCC approval (except for MT version)

 Mating connectors for the electrical connection see Page 8.

Bosch Rexroth AG, RE 50056, edition: 2016-09

Function, section

Hydro-electric pressure switches of type HED 5 are piston type pressure switches.

They basically consist of housing (1), installation kit with piston (2), compression spring (3), adjustment element (4) and micro switch (5).

The pressure to be monitored acts on the piston (2). The latter is supported by the spring plate (6) and acts against the continuously adjustable force of the compression spring (3). The spring plate (6) transmits the movement of the piston (2) onto the micro switch (5). This switches the electric circuit on or off, depending on the circuit set-up.

IF Notes:

In order to increase the life cycle, the pressure switch should be mounted with low vibrations and protected from hydraulic pressure surges.

RE 50056, edition: 2016-09, Bosch Rexroth AG

Hydraulic fluid		Classification	Suitable	Standards	Data sheet
			sealing materials		
Bio-degradable		HL, HLP, HLPD, HVLP, HVLPD	NBR, FKM, low-temperature seals	DIN 51524	90220
Bio-degradable	Insoluble in water	HETG	NBR, FKM	ISO 15380	90221
		HEES	FKM		
	Soluble in water	HEPG	FKM	ISO 15380]
Schwerentflammbar	 Water-free 	HFDU, HFDR	FKM	ISO 12922	90222
	 Containing water 	HFC (Fuchs Hydrotherm 46M, Petrofer Ultra Safe 620)	NBR	ISO 12922	90223

Important information on hydraulic fluids:

► For more information and data about the use of other hydraulic fluids, refer to data sheets above or contact us!

There may be limitations regarding the technical valve data (temperature, pressure range, life cycle, maintenance intervals, etc.).

The flash point of the hydraulic fluid used must be 40 K higher than the maximum solenoid surface temperature.

Flame-resistant – contains water:

- Maximum pressure differential per control edge 50 bar
 Pressure pre-loading at the tank port > 20% of the pressure differential, otherwise increased cavitation
- Life cycle as compared to operation with mineral oil HL, HLP 50 to 100%

 Bio-degradable and flame-resistant: When using these hydraulic fluids that are simultaneously zinc-solving, zinc may accumulate (700 mg zinc per pole tube).

Bosch Rexroth AG, RE 50056, edition: 2016-09

Maximum switchir	ng frequency	1/h	4800		
Switching accurac	y (repetition accuracy)		< ± 1% of the set pressure		
Switches			according to VDE 0630-1/DIN EN 61058-1		
Transition resistar	ice	< 50			
Insulation coordin	ation	Overvoltage category 3			
Contamination			Degree of contamination 3		
Bounce time	Bounce time ► ON ms		< 5		
► OFF ms		< 5			
				Utility model according to IEC 60947	
Minimum current mA			1,0 with 24 V DC	DC-12	
Maximum current A			0,5 at 50 V DC, inductive	DC-22	
		0,2 at 125 V DC, inductive	DC-22		
		0,1 at 250 V DC, inductive	DC-22		
		2,0 at 250 V AC	AC-12		

Switching power							
Switching cycles	Voltage U in V	Ohmic load max. in A	Inductive load, max. in A				
2 million	250, AC	2 A for 2 million circuits (AC-12)	0,5 A, cos. ϕ = 0,6 for 2 million circuits (DC-12)				
2 million	24, DC	2 A for 2 million circuits (DC-12)	0,5 A for 2 million circuits ³⁾				
5 million	24, DC	5,0 mA for 5 million circuits (DC-12)	_				

¹⁾ Direction of rotation:

– clockwise \rightarrow set pressure increase

– anti-clockwise \rightarrow set pressure decrease

- ²⁾ The cleanliness classes specified for the components must be adhered to in hydraulic systems. Effective filtration prevents faults and at the same time increases the life cycle of the components. For the selection of the filters see www.boschrexroth.com/filter.
- Value does not comply with any utility category according to IEC 60947

If Notes:

All variants can be unloaded to $p_{min} = 0$ bar. (Observe the switching pressure differential!)

RE 50056, edition: 2016-09, Bosch Rexroth AG

HYO

6/8 HED 5 | Pressure Switch

Characteristic curves: Switching pressure differential (measured with HLP46, **9**_{Oil} = 40 ± 5 °C)

IF Notes:

The switching pressure differential may increase within the course of the life cycle due to the deterioration of the oil quality and the number of load cycles.

Bosch Rexroth AG, RE 50056, edition: 2016-09
