Cordless Hydraulic Pumps

XC2-Series Cordless Pumps

The XC2-Series pumps take speed, battery run time and oil capacity to new levels greatly expanding the usage opportunities. Capable of larger tool and cylinder applications, cordless convenience can be extended further in the field or facility.

The high-performance brushless motor provides the speed of a 0,37 kW electric pump enabling corded productivity with cordless convenience.

Manual valve models feature a variable speed trigger for greater control of tool or cylinder advance and the Enerpac 54 Volt battery system enables significant work completion on a single battery charge.
